APACHE

# APACHE

The number one selling 100cc Quad in the UK and the other Apache models are now available in Spain. Apache Quads are Serious Fun. Why Serious Fun? Because having Fun is a very Serious Matter. New or young riders will immediately feel comfortable and confident and expert riders will feel in complete control. Apache Quads have been designed with both safety and performance in mind. All models feature a rider attached kill switch, throttle limiter and enclosed footwells to protect your toes. Inexperienced riders will feel much more confident and secure on a fully restrictable, yet responsive, light and nimble machine. Expert riders will delight at the power and handling of a perfectly matched engine and chassis, combined with powerful brakes (disc on 100cc models). All will really appreciate the electric start and autolube system (so no need to pre-mix petrol and oil) and the reverse gear on the SX100, a first on a 100cc quad. Some might just fall in love with the Silver or lust after the Metallic Red. Whatever the reason we know you will be Seriously Impressed with Apache Quads. We also think your going to be Seriously Surprised by the price.
